DATA SCIENCE · AI ENGINEERING · ANALYTICS

Arunabho *Kanti Som.*

Data and AI professional with 5+ years across analytics, machine learning, and AI engineering. I build predictive models, decision-ready dashboards, and AI workflows, connecting data collection and evaluation to tools people can understand and use.

PROFESSIONAL EXPERIENCE

2019 — Present

Data Science Consultant

2025 — Present

Beam Data · Toronto, Canada

- Built competitor-monitoring workflows with n8n, Python scraping, and PostgreSQL; connected Chroma and FAISS retrieval with scheduled LLM summaries of pricing, launches, and company signals.
- Delivered Power BI dashboards for an Amazon aggregator covering 200+ brands, tracking inventory, listing performance, MAP compliance, sales velocity, and SKU profitability.
- Engineered vehicle valuation models with Python, scikit-learn, and TensorFlow, using scraped historical auction records to support inventory pricing and sale forecasting.
- Built luxury watch pricing models and Tableau dashboards, processing reference, marketplace, and auction data on Azure.
- Developed research and social media workflow agents with OpenAI and Anthropic APIs and LangChain.

Data Analyst, Taxpayer Services

2022 — 2025

Canada Revenue Agency · Toronto, Canada

- Delivered SQL reports, KPI dashboards, and data-validation workflows for a federal contact-centre network.
- Applied exploratory and trend analysis to taxpayer, benefits, and service-delivery data to support workload planning and program improvement.
- Worked with sensitive taxpayer data using need-to-know access controls and audit traceability in reporting.

Data Analyst

2020 — 2022

Epiq Global · Toronto, Canada

- Analyzed claims, transactions, and seasonal patterns with Python and SQL; built clustering-based customer segmentation.
- Created Tableau dashboards for financial KPIs, customer behaviour, churn, and sentiment to support stakeholder decisions.

Data Analyst, Insurance

2019 — 2020

GreenShield · St. John's, Canada

- Managed 18,000+ member profiles in SQL and Excel; analyzed claims, premiums, and risk to support underwriting and policy decisions.
- Conducted profitability analysis and reserve estimations using claim frequency and severity for financial planning.

SELECTED WORK

Explore the portfolio ↗

Documented benchmark studies and interactive products. Results below describe held-out historical datasets, with methods and limitations available in the source.

Credit Card Fraud Detection

Source ↗

Chronological evaluation with independent calibration and frozen review policies. The primary policy identified 55 of 74 fraud labels with six false flags in 56,746 test transactions.

Python · Calibrated machine learning · Rare-event evaluation

Social Sentiment Analysis

Source ↗

Three-class TF-IDF benchmark with human-labelled TweetEval data, baseline comparison, and error analysis. Validation-selected model: 0.5587 macro F1 across 12,284 official test posts.

Python · NLP · Model comparison · Error analysis

Click Propensity Ranking

Source ↗

Group-isolated evaluation of sampled ad contexts. The top 10% captured 19.3% of test click labels, a 1.93× enrichment over test prevalence; the result does not estimate population CTR.

Python · Logistic regression · Ranking · Leakage controls

Interactive Products

Source ↗

Watch Atlas explores 1,629 archival watch references. **Country Memory Map** brings country, capital, and flag learning into an interactive geography arcade.

JavaScript · Data storytelling · Responsive interfaces

TECHNICAL PRACTICE

Across the data workflow

Analytics & machine learning

Python, SQL, Pandas, NumPy, scikit-learn, TensorFlow, PySpark, statistical analysis, customer segmentation, model evaluation and calibration.

AI & data systems

LLMs, LangChain, RAG, Chroma, FAISS, n8n, PostgreSQL, MySQL, web scraping, AWS, Azure.

Visualization & communication

Power BI, Tableau, QuickSight, Plotly, Matplotlib, Seaborn, Excel, data storytelling and stakeholder reporting.

EDUCATION

2017 — 2020

Master of Applied Science

Safety, Reliability and Risk Engineering
Memorial University of Newfoundland

2012 — 2016

Bachelor of Technology

Electronics and Communications Engineering
West Bengal University of Technology

2023

Diploma in Data Science and Big Data

WeCloudData Academy

CREDENTIALS

Lean Six Sigma Green Belt

ACCA FA1 Financial Transactions

Project Management Fundamentals
